

Performance Letter for SWPB6

This letter serves to confirm the performance specifications and operational capability of SWPB6 – a multifunctional jump starter and Portable Power Bank .

SWPB6 is engineered to serve as both a high-performance jump starter for automotive batteries and a reliable portable power bank for electronic devices. It`s compact design, robust safety features and high-capacity lithium battery make it suitable for emergency and everyday use.

The device has undergone rigorous internal testing and complies with Industry standards, safety and performance benchmarks.

All units are inspected for quality assurance prior to placing on the market.
