#### Section VII – First Aid Measures

#### Firs aid Procedures

If electrolyte leakage occurs and makes contact with skin, wash immediately.

If electrolyte comes into contact with eyes, wash with copious amounts of water for fifteen minutes, and contact a physician.

#### Section VIII: Fire and Explosion Hazard Data

#### Section IX: Accidental Release or Spillage

Steps to Be Taken in Case Material is Released or Spilled

Batteries that are leaking should be handled with rubber gloves.

Avoid direct contact with electrolyte.

#### Section X: Handing and Storage

Safe handing and storage advice

The battery is extremely sensitive to adverse effects of humidity. Be sure to store them in a place that is dry and subject to little temperature change. Do not place near the boiler or radiator, nor expose to direct sun light. Do not dispose of the battery in fire. Do not charge the battery. Do not short- circuit the battery. Do not put in backward position. Do not store in disorderly fashion, or allow metal objects to be mixed with stored batteries. Do not disassemble the battery, handing in such manner can cause the battery to explode, leak and injury.

#### Section XI: Exposure Controls / Personal Protection

Occupational Exposure Limits : LTEP

#### Section XII: Ecological Information

NA

#### Section XIII: Disposal Method

Do not incinerate or subject cells to temperature in excess of 80°C.Dispose of in accordance with local regulations.

#### **Section XIV: Transportation Information**

Lithium battery is considered as "Not Restricted" because they complied UN cargo Recommendations.

| Shipping Name | Lithium Metal Batteries |
|---------------|-------------------------|
| UN Number     | UN3090                  |

Organizations governing the transport of lithium batteries

| Area          | Method | Organization | Special Provision |
|---------------|--------|--------------|-------------------|
| International | Air    | IATA,ICAO    | Best Practice 008 |
| International | Ocean  | IMO / IMDG   | 188               |

The substance is not restricted to IMO IMDG Code according to special provision 188.

## Document Ref. No.:YF/MSDS2021 Changzhou Yufeng Battery Co., Ltd

These regulations are based on the UN Recommendations. Each special provision provides specifications on exceptions for shipping lithium batteries. All Yufeng's batteries meet all special provisions.

If all of following 2 requirements are satisfied, lithium metal batteries can be transported as "Not Restricted" cargo.

1) Lithium weight or equivalent lithium content must be less than value in table.

|         | Lithium Cell/Battery<br>(Lithium weight) |
|---------|--|
| Cell    | lg or less                               |
| Battery | 2g or less                               |

Equivalent lithium content (g) is calculated as 0.3 (g/Ah) times the rated capacity (Ah).

2) Each cell or battery is of the type proven to meet the requirements of each test in the UN Manual of Tests and Criteria, Part III, section 38.3. T1 - T8 Test.

Because the consignor has to take the responsibility, the customer has to confirm the exception conditions when shipping.

Lithium battery international transportation rules. Based on a United Nations recommendation, the regulation for lithium metal cell and batteries has been revised in the international Air Transport Association (IATA) dangerous goods regulations (DGR Rev.62).Each cell or battery pack meets the requirements of each test in the UN Manual of Tests and Criteria III, sub section 38.3. The Cells / Batteries are "Not Restricted" Cargo

1. Must comply with Section II of PI968-PI970 accordingly.

2. For cells, the lithium content should not be more than 1 g; while for batteries, the aggregate lithium content should not be more than 2 g.

3. For those Lithium metal cells / batteries contained in equipment, the equipment must be equipped with an effective means of preventing accidental activation.

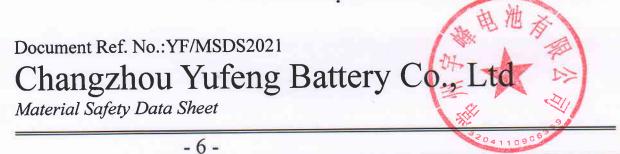

#### Section XV: Regulatory Information

IATA Dangerous Goods Regulations.

ICAO Technical Instructions for the safe transport of dangerous goods by air.

#### Section XVI: Other Information

This MSDS is described on the basis of present materials, information and data, so, please notice that it will be revised by new information. Also this sheet is supplied to entrepreneurs as reference information in order to handle batteries safely. Please notice that entrepreneur have to deal with batteries as they think fit.

#### Section XVII: Measures for fire extinction

Suitable fire extinguishing agent: CO<sub>2</sub>, fire extinguisher, ABC dry powder extinguisher, sand, etc. Can't quench, a small amount of can cover with the sand first, burn and need to use the fire extinguisher in a large amount. Much water can put out a fire was aroused a few battery. The fire fighter's special shelter is equipped: Wearing the air respirator, protects the helmet, glasses, etc.
