### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

First-aid measures general

: In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Advice for Medical Doctors: Brodifacoum is an indirect anti-coagulant. Phytomenadione, Vitamin K, is antidotal. Determin prothrombin time not less than 18 hours after consumption. If elevated, administer Vitamin K1 until prothrombin time normalises. Continue determination of prothrombin time for two weeks after withdrawal of antidote and resume treatment if elevation occurs in that time.

First-aid measures after inhalation

: Inhalation not likely.

First-aid measures after skin contact

: May cause slight irritation. Gently wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated skin with water. Get medical attention if symptoms occur.

First-aid measures after eye contact

: If eye irritation persists: Get medical advice/attention. Rinse immediately and plentifully with water and take medical advice.
