

Dryzone® Silicone Sealant Remover

Product Description

Dryzone® Silicone Sealant Remover is a ready-to-use silicone removal paste which chemically digests cured and uncured silicone elastomers and polymers, leaving their remnants easy to scrape away. It can be used to remove silicone on uncoated aluminium, copper, iron, steel, glass, ceramics and epoxy composites. It has little impact on rubber and non-silicone elastomers or painted surfaces.

Benefits

- Readily digests silicone
- Easier removal of silicone
- Low odour and hazard
- Compatible with most surfaces

Properties

Appearance	Amber paste
Size(s) & Packaging	150 ml cartridge
Coverage	5 litres at 5 mm thickness covers 1 m ²
Storage	Store in a cool, well ventilated area. Keep container tightly closed.
Shelf Life	12 months in unopened packs

Application Information

Dryzone® Silicone Sealant Remover is ready to use and should not be diluted. 5 litres at 5 mm thickness should cover 1 square metre.

To remove silicone sealants or gaskets, carefully cut away as much of the silicone as possible. Spread **Dryzone® Silicone Sealant Remover** using a brush or spatula to completely cover the remaining silicone that needs to be removed. The depth of cover should be at least twice as deep as the depth of silicone to be removed. Dwell time will vary depending on the characteristics of the silicone and substrate but are typically between 1 to 3 hours. After the dwell time has elapsed, rinse thoroughly with water. Repeat the process if necessary.

Contamination with water or oxygenated solvents must be avoided as this will render the remover inactive and may cause it to affect other materials. **Dryzone® Silicone Sealant Remover** will attack nylon (polyamide) and may have a softening effect on some non-silicone sealants.

Other Information

Dryzone® Silicone Sealant Remover is a safe, low odour formulation that does not contain halogenated solvents, heavy metals, cyanide or water. It has a high flash point, minimal hazard rating and its active substances are biodegradable. It does not contain dichloromethane.
