Mould Control Pack

All you need to treat and control mould in one handy pack

Description

The Sovereign Mould Control Pack contains Dentolite sterilising wash concentrate for removing black mould and two pots of Mould Eradication Additive for stirring into emulsion paint or wallpaper paste to prevent its return.

The wash and additive are easy and safe to use and will provide effective protection against mould growth.

Form Supplied: Twin pack, liquid concentrates

Pack Contents: 500 ml Dentolite
2x 50g Mould Eradication Additive
1 pair protective gloves
1 pair protective goggles
1 paint brush 1 sponge

Colour Range: Clear

HSE No: 4593

Contains: 7.5% w/w Benzalkonium Chloride.

Properties

The pack provides enough materials to treat up to 40m² of walls and ceilings, adequate for most mould growth outbreaks.

For larger or very severe outbreaks Fungi-Chek ready mixed paints are available. Sovereign also supplies other fungicidal products including positive input ventilation systems, passive vapour vents and special masonry coatings.

For further details of these products contact Sovereign or your local agent.

Usage/Preparation

Use of the pack is a simple two stage process:

1. Dilute the Dentolite in the ratio of 500 ml concentrate to 4.5 litres of water. Wash affected areas with Dentolite sterilising wash to remove and kill existing mould.
2. Add the Mould Eradication Additive to the chosen emulsion paint, wallpaper paste or cement based tile grout and stir in thoroughly using a mechanical mixer. Use as normal.

The pack provides enough materials to treat up to 40 m² of walls and ceilings.

General

There are basic measures to assist in the control of condensation and black mould. These methods are particularly helpful in the domestic environment but can be applied equally to commercial, catering, leisure or medical establishments.

It is always important to reduce the risk of condensation by observing the following simple recommendations.

- Ensure rooms are always warm and properly ventilated, maintaining some low heating throughout the day if possible.
- When cooking, washing, bathing or drying clothes, keep the door closed and the window open - this prevents warm moist air moving to colder areas of the building.
- In cold weather keep some heating on all the time.
- If a paraffin or flueless gas heater is used ensure a window is open a little (every litre of paraffin produces about 1 litre of water).
- Improve internal/external wall insulation.

Use ventilation where appropriate, such as the Sovereign's ConCure 20/20 or Passive Vapour Vents.

For Local Authorities and Housing Associations

Problems of mould growth caused by dampness and condensation are not always easily solved. Extra ventilation and the proper use of heating are two measures commonly recommended but rarely carried out by tenants and occupiers reluctant to let cold air into their homes.

What Can You Do?

Whether or not condensation continues to occur after making recommendations for remedial measures is largely an irrelevant point for most people; what they see and what they want rid of is the BLACK MOULD. The best method of treatment is to clean and sterilise affected surfaces with a fungicidal wash and then paint using a fungicidal coating.

Coverage: 40m² per pack when diluted.

Drying Time: 1-4 hours normally.

Storage: Between 5-30°C.

Shelf Life: 12 months unopened.

Health & Safety

Dentolite

Contains Quaternary ammonium compounds, benzyl-C12-16-alkyldimethyl, chlorides
Signal Word – DANGER

Causes severe skin burns and eye damage.
Very toxic to aquatic life with long lasting effects.

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Do not breathe dust/fume/gas/mist/vapours/spray.

Avoid release to the environment

Wear protective gloves/protective clothing/eye protection/face protection

Full health & safety information available on request

M.E.A.

Harmful if inhaled

Very toxic to aquatic life with long lasting effects

May cause damage to organs through prolonged or repeated exposure

Causes skin irritation

Harmful if swallowed

Causes serious eye damage

May cause an allergic skin reaction

Keep out of reach of children

Do not breathe dust/fume/gas/mist/vapours/spray

Wash face, hands and any exposed skin thoroughly after handling.

Wear protective gloves/protective clothing/eye protection/face protection

Full health & safety information available on request
