# Scrub Out Black Mould

Scrub Out Black Mould is a fungicidal cleaner, supplied ready to use in a trigger action spray bottle.

## Description

Scrub Out Black Mould is a fungicidal cleaner; containing a powerful blend of biocide and detergent to eradicate mould on internal surfaces.

**Form Supplied:** Liquid ready to use

**Pack Size:** 500ml Bottle

**Colour Range:** Clear

**Contains** 2% Benzalkonium Chloride

**HSE Number:** 4810

**Coverage:** 4-6m<sup>2</sup> per bottle, depending on the porosity and roughness of the surface

**Storage:** Between 5°C-30°C

**Shelf life:** 12 months unopened

## Properties

Scrub Out Black Mould is used to sterilise mould-infected surfaces before redecorating. It may also be used as a maintenance wash to control mould or algae where painting is not possible or desired. Scrub Out Black Mould can also be sprayed around bath and shower areas to prevent mould growth on sealants and grout.

## Usage

Ready to use. A second application allowed to dry on surface will delay return of any mould. When used to prevent mould growth in bathrooms, Scrub Out Black Mould should be sprayed on to surfaces at least once a week as a maintenance measure. Do not rinse off. Service life depends on local conditions, i.e. condensation will reduce the expected service life

## General

There are basic measures to assist in the control of condensation and black mould.

These methods are particularly helpful in the domestic environment but can be applied equally to commercial, catering, leisure or medical establishments.

It is always important to reduce the risk of condensation by observing the following simple recommendations:

- Ensure rooms are always warm and properly ventilated, maintaining some low heating throughout the day if possible.
- Always use extractor fans in kitchens and bathrooms.
- When cooking and bathing keep the door closed and the window open.
- Do not dry clothes on radiators. Tumble dryers must be vented externally unless of the condensing type.
- In cold weather keep some heating on all the time.
- Improve internal/external wall insulation.

Use a ventilation system where appropriate, such as the Sovereign ConCure 20/20 Positive Input Ventilation Unit.

When repainting areas then Sovereign Fungi-Chek Emulsion or Sovereign Anticon Emulsion should be used as black mould cannot grow on this.

## General Maintenance

Scrub Out Black Mould used alone will not prevent the re-growth of mould in the long term. Its use is to remove active attacks prior to decoration. For long-term eradication of mould a Sovereign ConCure 20/20 PIV Unit can be fitted. This device acts to produce a positive air pressure within the domestic environment and will keep the relative humidity below a level that will support condensation.

## Health & Safety

Avoid skin and eye contact.

Handle only when wearing protective clothing.

Wash splashes from skin with soap and water, flush eyes with copious amounts of water and seek medical attention if irritation persists.
