

143*210mm 2024.10.7-1

INSTRUCTION MANUAL

IMPORTANT: PLEASE READ THESE INSTRUCTION BEFORE USING THE PRODUCT AND RETAIN FOR FUTURE USE.

Please follow the instructions carefully to ensure the safe and effective operation of the device.

- 1. Remove power
- 2. Switch on motor switch and fan with the red on
- 3. Switch on heat switch and fan with the red on

WARNING: Before using the heater, make sure it is mounted tightly on the wall.

OPERATING THE HEATER

Control Panel

Red button only: ON - OFF
Cool air only when turned on.
Red button = 1 white button = warm air 1500W
Red button = 2 white buttons = hot air 3000W

CLEANING THE HEATER

Turn off the heater and remove from the power supply. Always allow the heater to completely cool before handling or cleaning. Clean the outside by wiping with a soft, dry cloth. Regularly clean the air intake and air exit with a soft, dry cloth or vacuum cleaner nozzle to prevent dust or other impurities from obstructing and affecting the air circulation.

Do not allow water or other liquids to run into the interior of the heater, as this could cause a fire and/or electrical hazard.

Do not use harsh detergents, chemical cleaners or solvents as they may damage the surface finish of the components.

MAINTENANCE AND STORAGE

Ensure the product has been turned off and the power cable is unplugged from the electrical outlet before moving. Clean the air intake and air exit. When the heater is not in use for a long period of time it should be protected from dust and stored in a clean, dry place. Do not place any heavy items on top of the appliance during storage as this may result in possible damage to the appliance.

DISPOSAL

Only dispose of electrical appliances at designated municipal waste facilities. Contact your local government for information regarding the collection systems available. If electrical appliances are disposed of in landfills or dumps may prove hazardous to health.

TCP Air Curtain Heater not only creates a seamless barrier to block out cold air but also keeps your space cozy with its efficient heating system. Perfect for commercial entrances, retail spaces, and industrial environments, it ensures energy savings while maintaining the ideal indoor temperature.
Energy Efficiency: Reduces heat loss, lowering your heating costs.
Comfort & Convenience: Keeps your indoor environment warm without compromising air circulation.
Easy Installation: Designed for hassle-free setup and operation.
Quiet Performance: Enjoy warmth without the noise.

SPECIFICATION

Model	TCPAHCURTAINTCP3KW
Description	TCP White Air Curtain 3KW
Voltage	230/240V~50Hz
Maximum Power Output	3000W
Heating Setting	1500W/3000W
Electrical supply connections	Line - Brown or Red Neutral - Blue or Black Earth - Green and Yellow This product must be connected to Earth.

IMPORTANT SAFETY INSTRUCTIONS

The following should always be observed for safety:

SAFETY TIPS: The heater is designed to be used in a safe manner. It is a safety device which switches the heater off in the event of any fault. The heater is designed to be used in a safe manner. It is a safety device which switches the heater off in the event of any fault. The heater is designed to be used in a safe manner. It is a safety device which switches the heater off in the event of any fault.

The heater is designed to be used in a safe manner. It is a safety device which switches the heater off in the event of any fault. The heater is designed to be used in a safe manner. It is a safety device which switches the heater off in the event of any fault.

WARNING: The product should be installed by a competent person or qualified electrician in accordance with the current building and fire regulations. As the heater is not a fire-rated unit, it is not recommended to install it in a fire-rated area. The product is not a fire-rated unit. It is not recommended to install it in a fire-rated area.

WARNING: Switch off the main power before commencing installation / maintenance and ensure the appropriate circuit fuse is left off 10A.

WARNING: If the appliance is installed in a toilet or bathroom an existing switch must be installed outside the bathroom adjacent to the installation point.

WARNING: The product becomes hot on surface areas can cause burns if touched. Always place on non-flammable surface, moving or maintenance.

- The product is designed for permanent connection to a fixed wiring via a fixed lead (with a 1.5 Amp fuse). Do not connect the supply via a portable switch for ease of operation.

- The product is intended for indoor use. Do not use the product for any other purpose.
- Do not store or use any flammable materials in close proximity to the heater.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- To reduce the risk of fire, do not cover or obstruct the air inlet or outlet grilles, any flexible ducting, or any other flammable material at a minimum distance of 1m from the air inlet or outlet grilles.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.

- Do not use the heater in the immediate surroundings of a bath, a shower or a swimming pool, or where there is a risk of excessive moisture or steam.
