

# Simply Silent™ DX150HTS

**6" / 150mm axial extract fan**

Toolstation Product Code **29938**

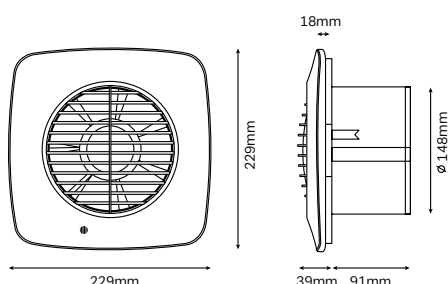

The Simply Silent DX150HTS intermittent extract fan is designed for those looking for something conventional, with a modern twist. The fan controls humidity, odours and mould growth effectively in kitchens, utility rooms, larger bathrooms and individual offices. Suitable for both wall and ceiling fitting, the DX150 range has 2 speeds, selectable at install, and comes complete with backdraught shutters.

DX150HTS is a Humidistat / Timer fan. This means that the fan can be activated by either reaching a threshold of humidity, or via an external switch such as a lighting circuit. The fan will continue to run until humidity has returned to below threshold level and for a period (can be set between 30s and 30mins) after the external switch is turned off (whichever is the longer).

## Technical Details

	<b>DX150HTS</b>
