

Traditional & Contract Reviver Kit 1/2"

Fitting instructions:

Suitable for most 1/2" sink and basin taps.

1. Isolate water supply to taps. Open the taps drain pipework.
 2. Remove old tap handles.
 3. Remove the valves (unscrew anticlockwise using the suitable spanner). pay attention to the body of the tap/mixer should not be rotated, which may disturb the connection to the pipework.
 4. For the replacement tap reviver kit, turn the handle anticlockwise to ensure that the new valve is in close position. Then remove the retaining screw and handles.
 5. Insert the new valve into old tap housing, hold the tap spout to prevent twisting and tighten firmly.
 6. If the thread of old tap housing is a wider diameter (more than G1/2"), please purchase SKU NO.53820 part before assembling.
 7. Replace the handles and lock to ensure that the valve operates well.
 8. Turn on the water supply and check for leaks.
- If any problems please contact a qualified plumber.
