AB195 • 223851 GEL KNEE PADS USER INFORMATION

This product is a Type 1 knee protector in accordance with EN 14404-2:2024 which is designed to minimize the risk and provide protection for working in a kneeling position and immediate injuries from hard surfaces and small stones and similar objects on the surfaces. These protectors are not intended for sports. Also be reminded that no protectors can offer full protection against injuries. Care must always be taken while carrying out risk-related activities.

- Any contamination, alteration to the protector, or misuse will dangerously reduce the performance of the protector. This product is not water-resistant. The kneepads have a service life of a minimum of 2 years, although this may vary. The products should be inspected prior to every use.
- To optimize protection, in some instances it may be necessary to use these products with suitable boots/gloves/helmet/ear defenders. In this case, before carrying out the risk-related activity, consult your supplier to ensure that all your protective products are compatible and suitable for your application.
- If the product becomes damaged, it will NOT provide the optimum level of protection and therefore should be immediately replaced. Never use a damaged product. If the knee pads show signs of severe wear such as broken shells or ripped pads, the knee pads should be replaced.
- Level 0: Knee protectors suitable for use on flat or non-flat floor surfaces and provide no protection against penetration.
- Level 1: Knee protectors suitable for use on flat floor surfaces where objects more than 1 cm high are not a common hazard and provide protection against penetration at a force of at least (100 +/- 5) N.
- Level 2: Knee protectors suitable for use in severe conditions such as when kneeling on broken rocks in mining and quarry work and provide protection against penetration at a force of at least (250 +/- 10) N.

Performance and Limitations of Use.

- This product has been tested in accordance with EN 14404-2:2024 and has achieved the performance level 1. These kneepads are designed to give limited protection of the wearer's knees when working in the kneeling position. The worker must however be aware of the danger of chronic damages to the knees and regularly leave the kneeling position to slow down the effects.

Symbol Explanation

Fitting and Sizing

UK
CA

This symbol stands for "United Kingdom Conformity Assessed". With the UKCA-marking, the manufacturer confirms that this product complies with applicable regulations and standards within Great Britain.

- This product is intended to be placed on your knee and strapped onby the bottom and top straps in a comfortable and stable position;ensure that the straps does not pass within the center of the back of the knee and does not constrain blood flow. Products which are either too loose or too tight will restrict movement and will not provide the optimum level of protection. Always test the positioning of the pads before commencing any work. This protector is available in size L and has adjustable straps. Ensure the soft side is facing your knee and that the straps wrap around the back of your leg with the hook-and-loop tape on the straps aligned to hold the straps in the correct position.

Storage and Transport

- When not in use, store the product in a well-ventilated area shielded from extreme temperatures. Changes in environmental conditions such as temperature may reduce the performance of the protector. Never place heavy items on top of the product. If possible, avoid excessive folding and preferably store the product hanging vertically. If the product is wet, allow it to dry fully before placing it into storage.

Materials

- MATERIAL: PVC cap (20%), 600D polyester (40%), EVA (20%), GEL (10%), Hook & Loop (5%), others (5%).

PRODUCT REFERENCE: AB195 • 223851

Cleaning

- This product should be wiped clean — do not dry near a heat source.

Warning

- An explanation of the mark designating the inner (or outer) surface and the orientation of the wearable knee protector.

- A warning about any changes in environmental conditions, such as temperature, that would significantly reduce the performance of the knee protector.
- A warning about any contamination, alteration or damage to the knee protector, or misuse that would dangerously reduce the performance of the knee protector.

Disposal

Dispose of the product according to local regulations. If in doubt, consult your local authorities.
